

The Key to Better Employee Engagement: Delight and Unite Your Workforce with an Interactive Intranet

Companies and cultures thrive when employees feel connected to colleagues, empowered in their jobs and invested in their organization's mission. Traditional intranets, with their one-way, top-down communications and static content, don't foster that kind of deep, authentic engagement.

Jive's Interactive Intranet does. It's a new kind of intranet that opens up real conversation, rich collaboration and personal connections at every level of your business: between leadership and employees, among co-workers and across locations. It improves everything from onboarding to training and HR support, gives everyone a voice and builds the kind of enthusiasm and job satisfaction that helps you attract, develop and retain top talent.

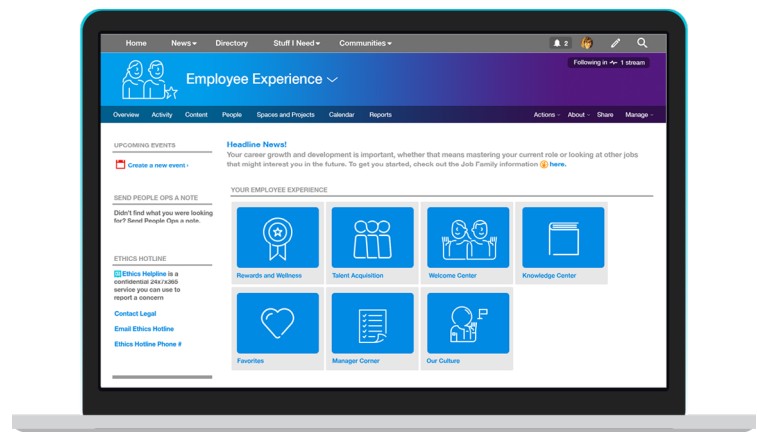

Solve Your Biggest HR Challenges:

- **Onboard new hires faster** by immersing them in company culture and giving them an overview of what's going on from day one.
- **Motivate, reward and train employees** by making feedback, recognition and learning a seamless part of everyday work.
- **Align your workforce** with more effective internal communications and company-wide dialogue that gets everyone on board.
- **Improve HR support** while cutting costs with great self-service and peer support that resolves issues fast while offloading HR staff.

- **Beautiful news page and auto-subscription streams:** deliver information that employees can't miss (and won't want to).
